

Installing Zoom on Mac with Chrome browser

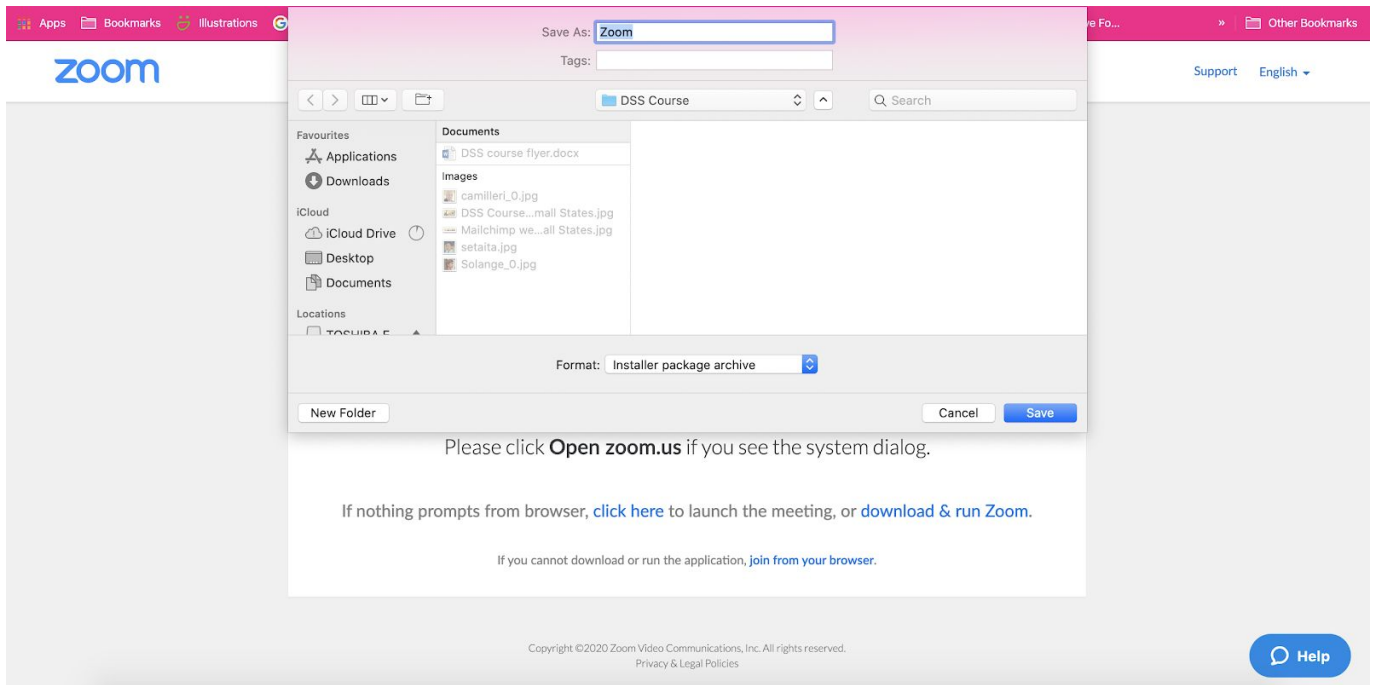

1. Click on the **Join Zoom Meeting** link in the invitation e-mail you received.

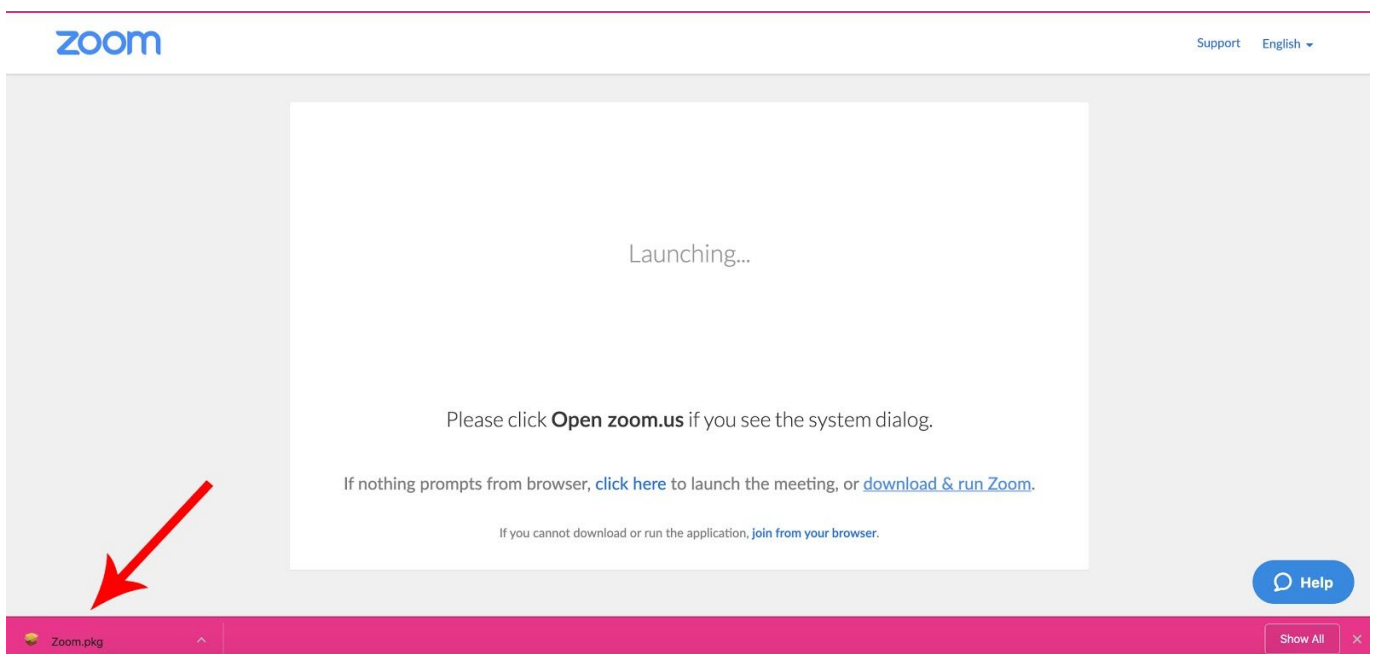

2. On the next screen, click on **download & run Zoom**.

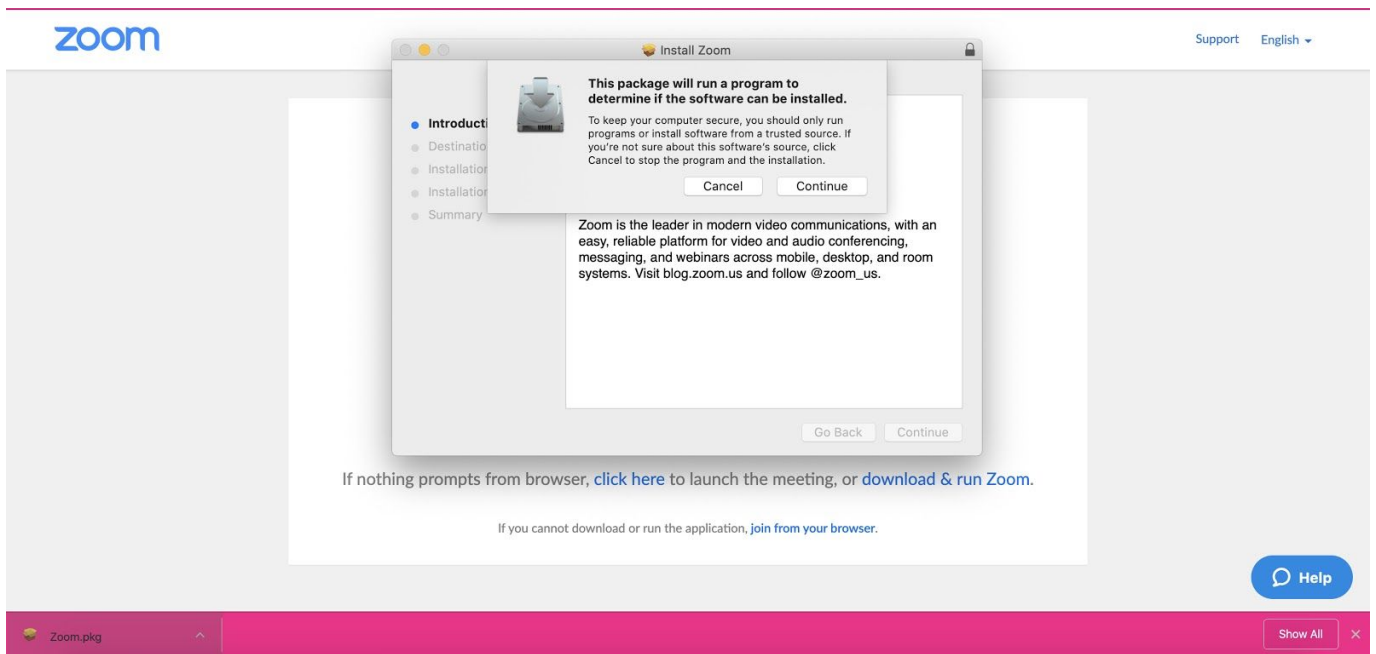

[step missing here]

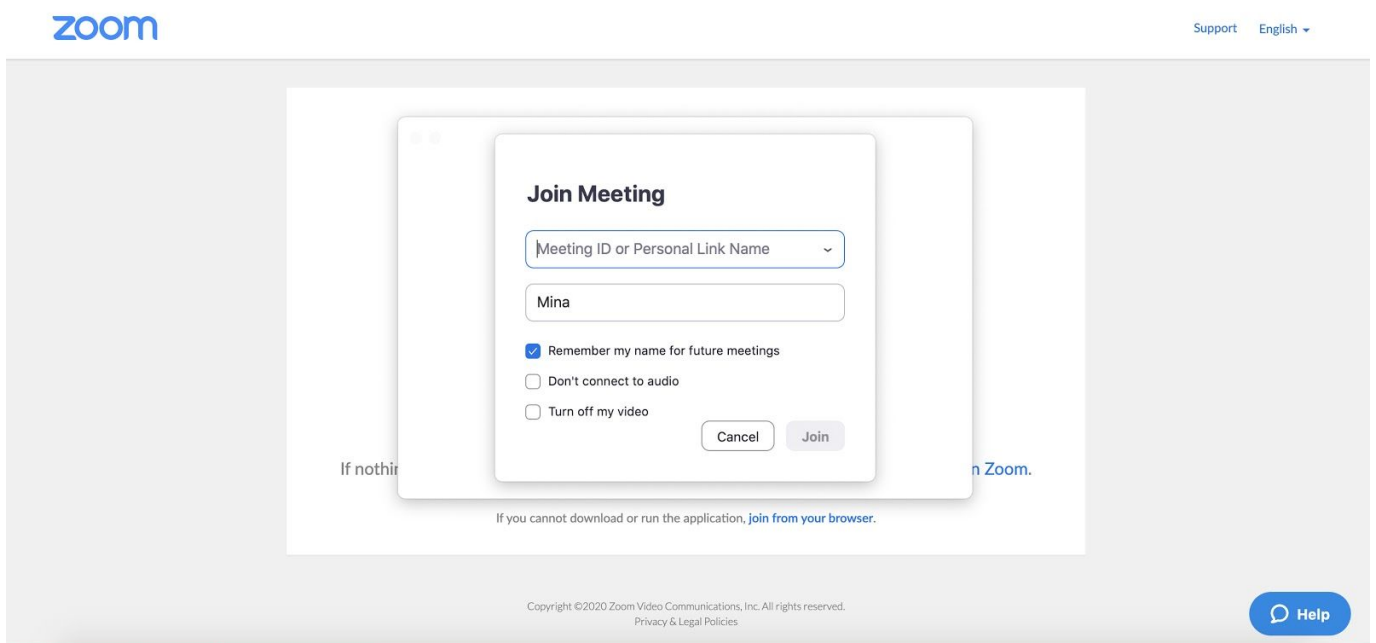

3. In your download section (bottom left corner of your browser) you will find the Zoom **installation file**. Double click to run it. The installation will start.

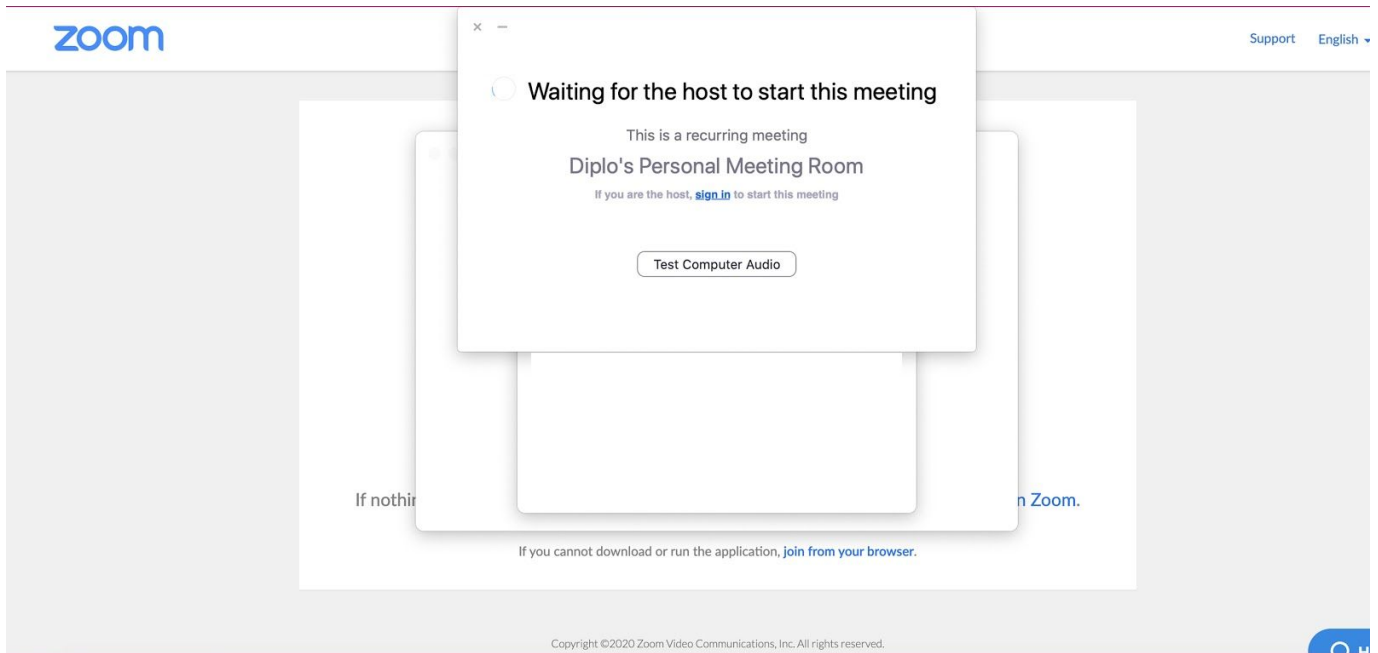

4. If a pop-up window with security settings appears, click on **Continue**. (If you experience further issues with installing, consult this [page](#) which explains application access settings on your Mac computer, and how to change them).

5. Once installation is done, you will be prompted to enter your name. Click on **Join Meeting**.

6. You will enter the **Waiting Room**. The host will let you into the meeting at the scheduled meeting time.

7. In the meantime, you can test your audio connection by clicking on the **Test Computer Audio** button. Test your speaker and microphone.
