Internet Governance BAROMETER (SEPTEMBER 2015)

IG Barometer indicates the presence of specific IG issues in the public policy debate in comparison to the previous month

Cybersecurity

US and China agree not to conduct, or knowingly support, cyber-enabled theft of intellectual property, including trade secrets or other confidential business information for commercial advantage; also to work together, and with other nations, to promote international rules of the road for appropriate conduct in cyberspace

Cybercrime: In Wikipedia extortion scam, rogue editors targeted small businesses and celebrities. Lizard Squad cyber-attackers disrupt UK National Crime Agency website after teenagers arrested and released on bail over alleged Lizard Squad cyberattack. Cyber threats are evolving, warns US National Intelligence director: we might soon see cyber operations that will change or manipulate electronic information to compromise its integrity, instead of deleting or disrupting access to it.

Global IG Architecture

Governments unanimously adopt 17 Sustainable Development Goals, and commit to 'significantly increase access to ICT and strive to provide universal and affordable access to the Internet in least developed countries by 2020' (Goal 9.c). The Internet will also be essential for the implementation and monitoring of the SDGs.

German Foreign Minister Steinmeier: 'The Internet is a global public good that we need to protect'. (Statement delivered during open business forum on ICT, technology and foreign policy in Berlin).

IANA Transition

The face-to-face meeting in Los Angeles of the Cross Community Working Group on Enhancing ICANN Accountability triggered intense discussions with ICANN Board members on the second draft proposal for enhancing accountability. What's next for the working group's proposal?

Comments submitted to IANA Stewardship Transition Coordination group (ICG) on Interim Final Proposal to Transition the Stewardship of the IANA Functions, and to CCWG-Accountability on its second draft proposal.

ICANN and New Domains

GoDaddy Inc wins cybersquatting lawsuit brought by the Academy of Motion Picture Arts and Sciences regarding 293 domain names (including academyawards.net, and oscarsredcarpet.com); Academy failed to show that GoDaddy acted in bad faith.

ARIN, the American Registry for Internet numbers, has issued its final block of IPv4 addresses from its free pool. Will this have an impact on the rate of deployment of IPv6?

Internet Governance BAROMETER (SEPTEMBER 2015)

IG Barometer indicates the presence of specific IG issues in the public policy debate in comparison to the previous month

Online Privacy & Data Protection

European Court of Justice advocate general Yves Bot issues a non-binding opinion in Max Schrem's case against Facebook: A 'deal easing the transfer of data between the United States and the EU is invalid'; 'the surveillance carried out by the United States is mass, indiscriminate surveillance'.

Activists propose the 'Snowden Treaty', or, the International Treaty on the Right to Privacy, Protection Against Improper Surveillance and Protection of Whistleblowers. Treaty unveiled in New York.

Law enters into force: Data of Russian users held on Internet servers, such as Facebook and Twitter, to be stored in Russia.

In Thailand, a cabinet resolution unearthed by a Bangkok-based reporter, shows Thailand's intention to create a China-style Great Firewall - or a 'single internet gateway'. The gateway would be used 'to control inappropriate websites and to control the flow of information into the country from overseas via the internet'.

New US Justice Department policy will require federal law enforcement officials to obtain warrant before using Stingray technology to surveil mobile communications. Policy does not apply to state and local agencies, or federal agencies using the device abroad.

Net Neutrality

As predicted, several ISPs and trade organisations have filed suit against the FCC to overturn the FCC's Net neutrality rules it issued in March. In response, EFF is inviting network engineers, computer scientists to sign statement for amicus brief.

Jurisdiction

French data regulator has rejected Google's appeal against the global enforcement of the right to be forgotten. Google must now comply with the formal notice or face fines.

In Microsoft case, the US government is requesting emails from a Hotmail account hosted in Ireland over a 2013 drugs case. A jurisdiction battle has ensued: Microsoft says US government has no authority over data centre in Dublin; US government says Microsoft is a US company, subject to US laws.

E-commerce

Google rebuffs the European Commission's anti-trust charges as 'unfounded'. Google's General Counsel: preliminary conclusions were 'wrong as a matter of fact, law, and economics'.

Google accused of abusing its dominant search position in India and Russia; US Federal Trade Commission opens preliminary anti-trust investigation on Google over Android.

Are Uber's drivers employees or independent contracts? San Francisco court rules that drivers can enter class action litigation, exposing company to potential litigation by more than 160,000 Californian drivers. Brazilian President calls for regulation of Uber.

Main events in September

1-3 Sept: 3rd AfICTA Summit - ICT: Lighting the way to Development and Prosperity Across Africa (Johannesburg, South Africa)

2-4 Sept : IGF 2015 Third Open Consultations and MAG meeting (Paris)

9-10 Sept : Global Cyberspace Cooperation Summit VI (New York)

14 Sept – 2 Oct: UN Human Rights Council - 30th regular session (Geneva)

15 Sept : UNGA 70th session starts today (New York)

18-19 Sept: IANA ICG Face-to-Face Meeting (Los Angeles)

25-27 Sept: UN Summit to adopt the post-2015 development agenda (New York)

28-29 Sept: European Cybersecurity Forum (Kraków, Poland)

30 Sept – 2 Oct: 3rd Europol-INTERPOL Cybercrime Conference (The Hague)
